

S3 Static Website

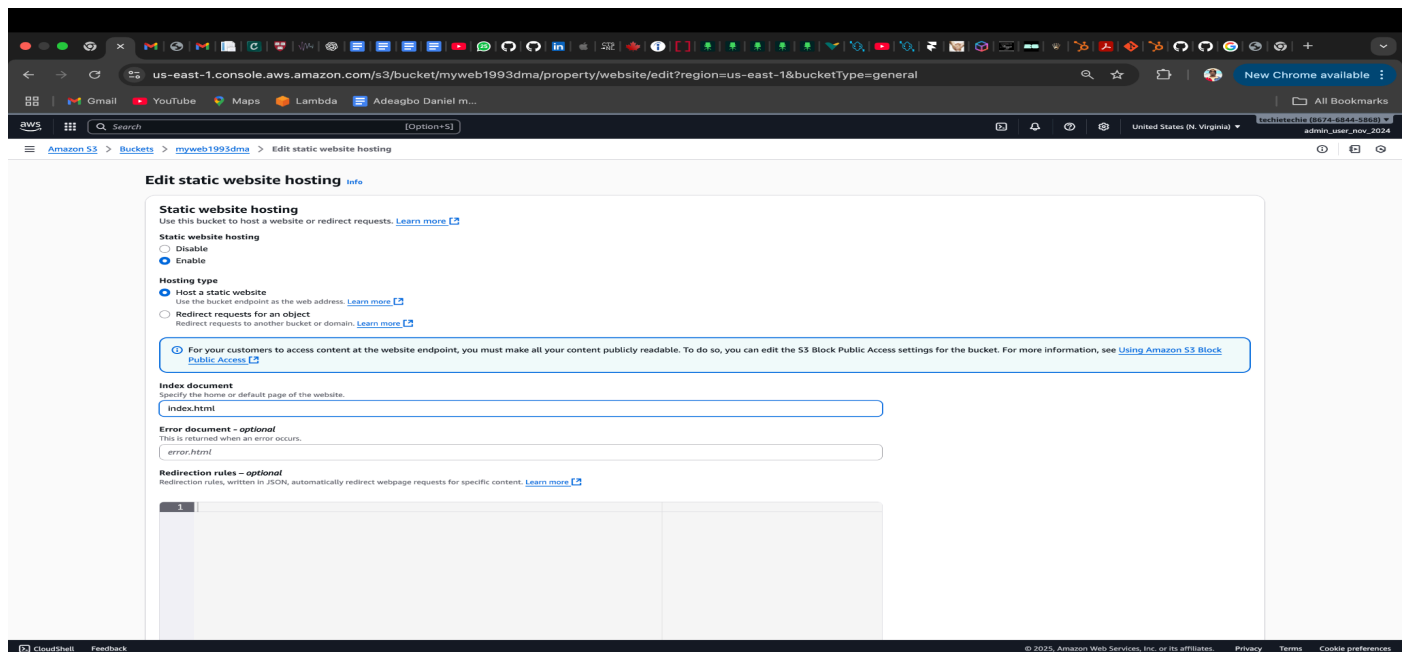

Name: Daniel M Adeagbo

S3 Static Website Hosting

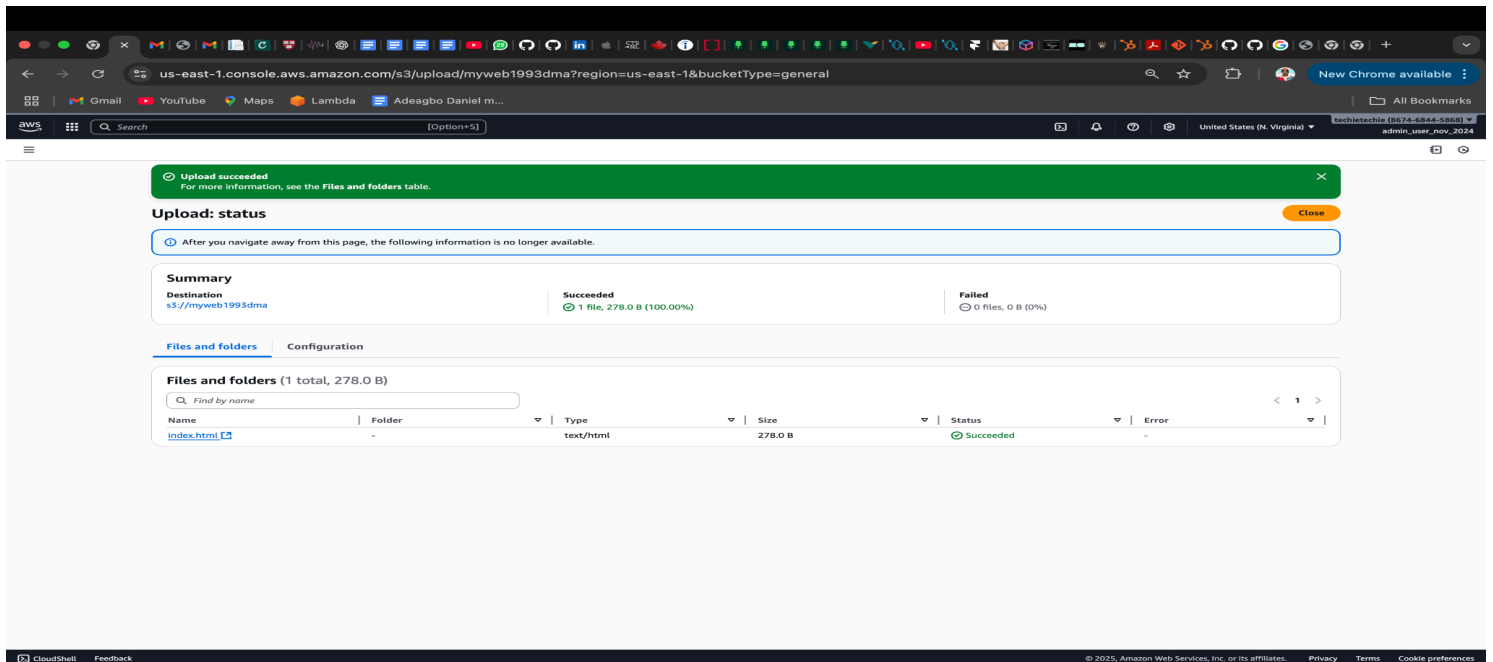

Create and host a static website in S3 that will display the following: “This website is hosted on S3 and not EC2 because S3 is cheaper and well suited for static website – Your_Name_here” (Share screenshot)

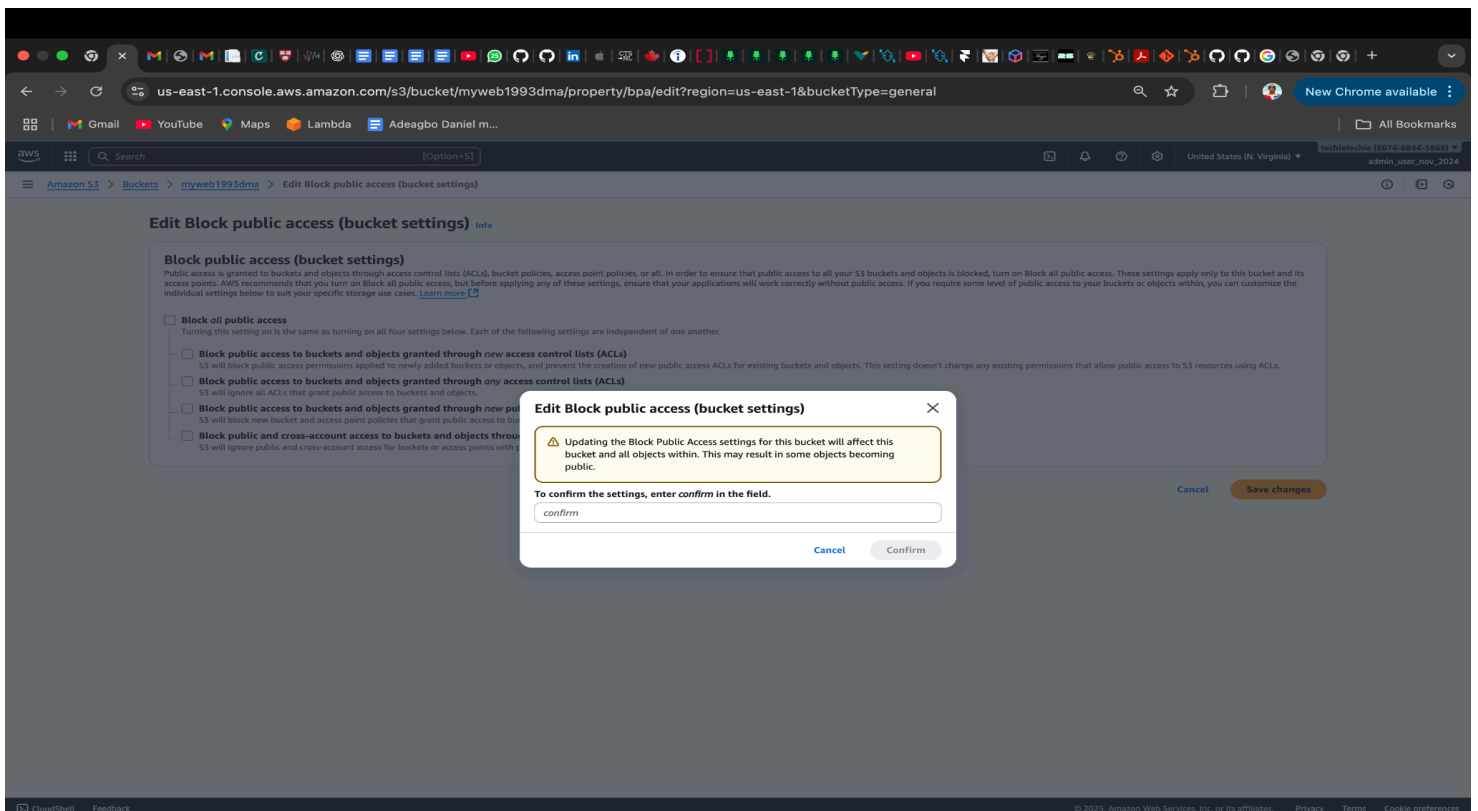

Enable Static Website Hosting

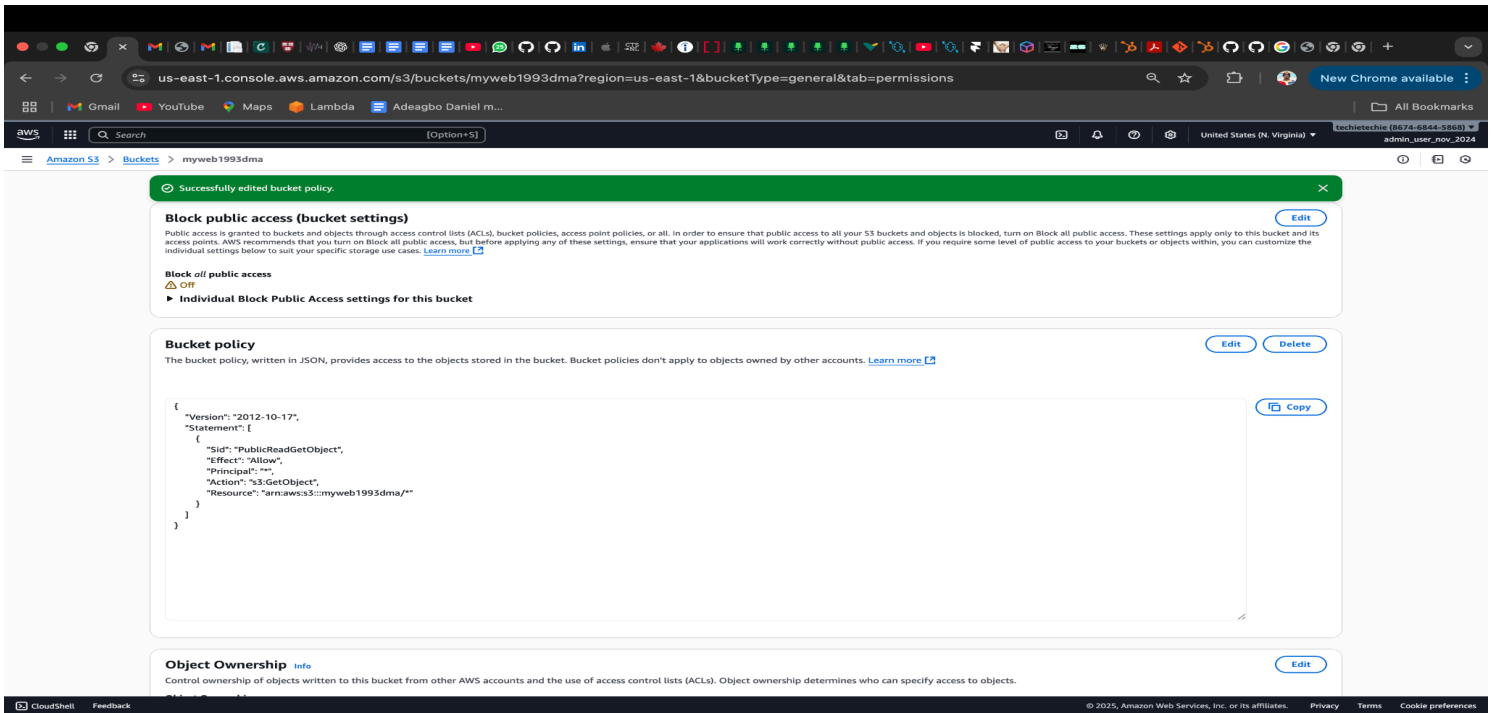

Next i uploaded the index.html file to the s3 Bucket

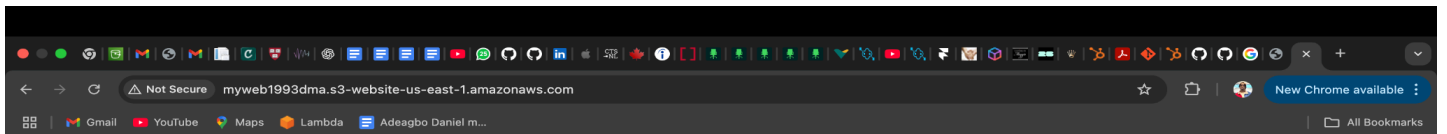

I then made the website public so that it can be accessible

I made the object in the bucket public by adding a Json Policy

Result after i accessed the webpage

This website is hosted on S3 and not EC2 because S3 is cheaper and well suited for static website by Daniel
